SUMMARY

MCA student and aspiring AI Automation Developer with hands-on experience building n8n workflows, AI-powered automation concepts, REST APIs, and full-stack applications. Experienced with n8n, Java, Spring Boot, React, MySQL, MongoDB, AI/LLM APIs, and Docker. Interested in building reliable workflow automation and AI-powered business solutions.

TECHNICAL SKILLS

Automation: n8n, Workflow Automation, Webhooks, REST API Integration, JSON/Data Workflows

AI: Gemini API, LLM APIs, Prompt Engineering, AI-assisted Development, AI Agents

Backend: Java, Spring Boot, REST APIs, JWT,

Frontend: React, JavaScript, HTML5, CSS3, Vite

Databases & Tools: MySQL, MongoDB, Git/GitHub, VS Code, Cursor

AI AUTOMATION PROJECTS

LinkedIn Content Agent — n8n Automation

- Designed an automated content workflow using n8n, RSS feeds, Google Sheets, and AI APIs for researching and generating LinkedIn content.
- Structured scheduled content streams for AI/tech news, project/build-in-public updates, and developer/AI insights, with fallback and quality-control concepts.
- Designed the workflow for cloud/VPS deployment so automation can run independently of a local PC.

SalesPilot AI — AI Sales Automation Platform

- Designed a multi-agent automation architecture using n8n as the orchestration layer with SerpAPI, Gemini API, Gmail API, Spring Boot, React, and MySQL.
- Planned workflows for lead discovery, website research, AI opportunity analysis, proposal generation, CRM synchronization, and follow-up automation.
- Designed secure webhook/API communication between n8n and the Spring Boot backend, with JWT authentication, encrypted API credentials, and audit logging.

FULL-STACK PROJECT

SmartBuild SaaS — Construction Management Platform

- Built a full-stack platform using React, Vite, Java 17, Spring Boot, MySQL, JWT, Hibernate, and REST APIs for equipment/site tracking, diesel and work logs, and reporting.
- Implemented role-based authentication, responsive UI, secure REST APIs, and cross-device access for construction operations.

CLIENT PROJECTS

SAISNEH Infrastructure Company Website — Developed a responsive business website using HTML5, CSS3, and JavaScript with project portfolio, certifications, client logos, document/image management, and contact functionality.

Bhandare Crane Service Website — Built a production-ready responsive business website with service listings, contact integration, performance optimization, and lead-generation-focused content.

EDUCATION

Dr. DY Patil Vidhyapeeth, Pune — Master of Computer Applications (MCA), 2025–2027

Sri Balaji University, Pune — Bachelor of Computer Applications (BCA), 2022–2025

CERTIFICATIONS & ACHIEVEMENTS

LinkedIn Learning: Software Testing, Artificial Intelligence, Blockchain, Java | Deloitte Technology Job Simulation — Coding & Development (2025) |

UI/UX Developer Course — PW Skills | CCT Member (2023–2025) | NSS Volunteer (2022)
